Thursday, February 15, 2018 8:57 AM

I wanted to see what I could do with the venture game in unity, and I also don't rally know where it's going other then space exploration and some sort of survival aspect. To finish up here's some memes on space exploration and the games involved. :)

SPACECRAFT SCIENTIST/ENGINEER

What my friends think I do

What my parents think I do

What society thinks I do

What my boss thinks I do

What I think I do

What I really do

WHEN DEEP SPACE EXPLORATION RAMPS UP,

**IT'LL BE THE CORPORATIONS THAT WILL NAME
EVERYTHING**

quickmeme.com

**WHEN THE FIRST CHILD IS
BORN ON MARS, WE WILL
HAVE TO ADD PLANET OF
BIRTH TO OUR PASSPORTS.**

World

Thursday, February 15, 2018 8:57 AM

In one mode, Our Universe Mode, you start in our universe and then explore it, survive it and build up and fight different threats.

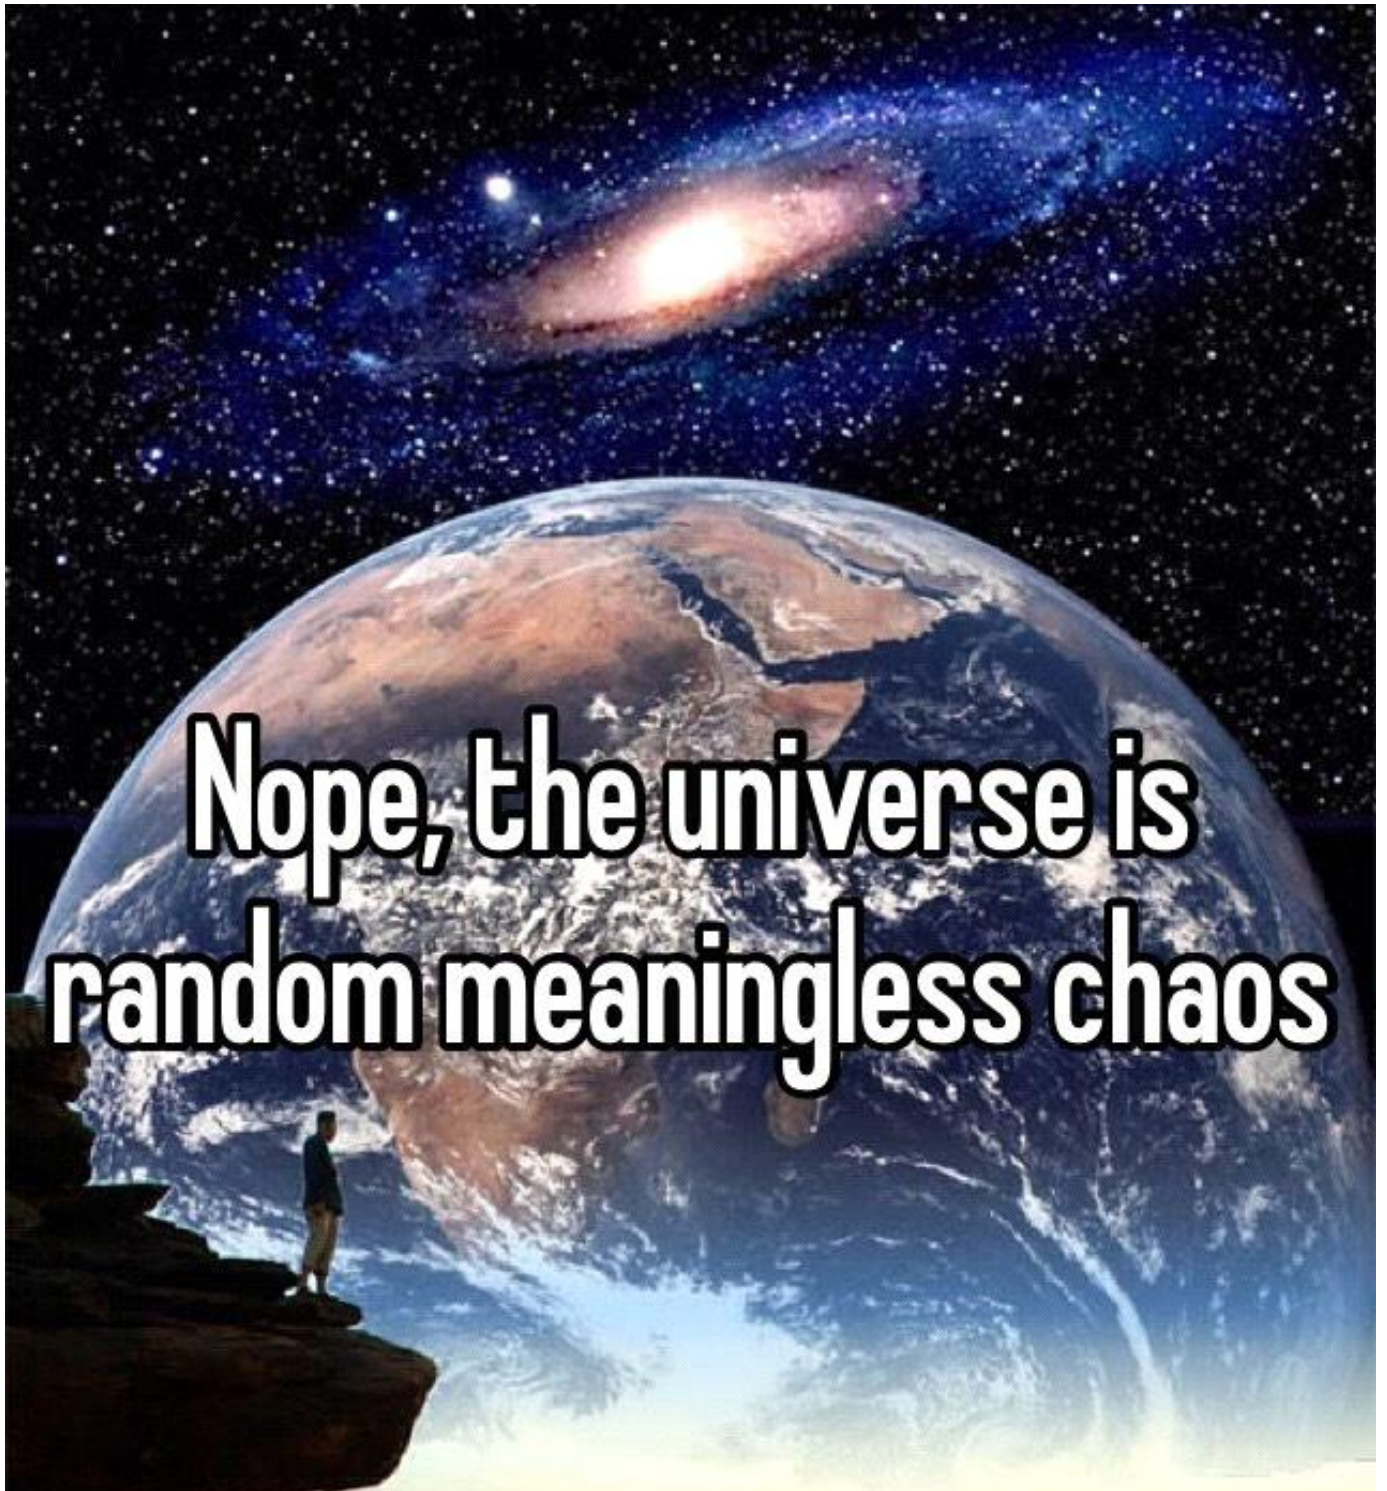

In a different mode called Your Universe you can make your own universe and do what you want to, then explore it, survive it and build up and fight different threats.

There is one more mode it's called Random Universe Mode it generates a system and you do what you want to, then explore it, survive it and build up and fight different threats. .

Character

You are a space explorer your skills vary and you can think of marvelous things to do.

Space Explorer

Space Cowboy

Gameplay

Thursday, February 15, 2018 9:34 AM

Exploration, Crafting, Friendship

I was thinking that I make something similar to Ark Survival, Skyrim and Minecraft, but with space and randomized creatures.

I want to play around with unity more before I could decide on 2D or 3D.

Start

Play the venture video in the background

Remember when you were little and you wanted to venture out farther and look at the different exciting thing in the world, a world beyond your crib, well as an adult we don't have time to venture out the way we want to, we use games for that and it is one of my fondest dreams to be an astronaut. So I proudly reveal Venture, a Space Exploration, Crafting, Multiplayer game that allows you to explore our solar system in the Our Universe mode, then you can play with friends and make your own solar system in Your Universe Mode, and Random Universe Mode which generates a system. I was thinking that I could make something similar to Ark Survival, Skyrim and Minecraft, but with space and randomized creatures. Before I start making it in Unity I wanted to play around with Unity more before I could decide on 2D or 3D. There have been what I would call prototypes, Venture 1.0 and 2.0, this one will be version 3.0.

Show the prototypes.

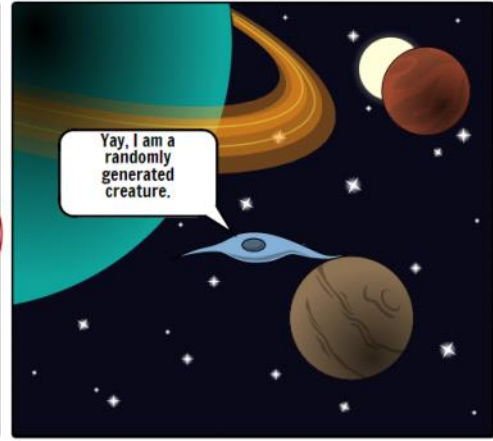

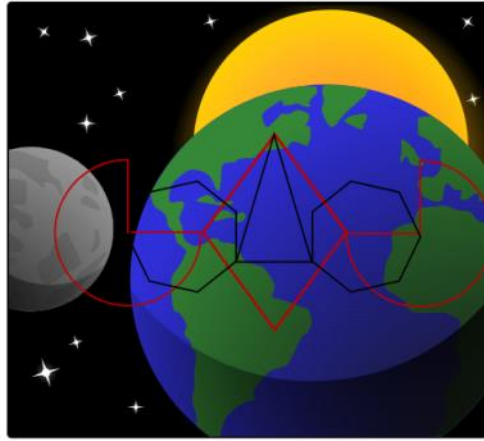

End

So who wants to venture out and ask some questions?
